

October 2008

Dear Chemistry Teacher:

_____ will be attending the Mountain School beginning January 31, 2009. The chemistry program here is unique in that we take students with different introductions to chemistry and attempt to get them all up to speed with one another in order to complete the course successfully. Our chemistry course also takes advantage of the special opportunities provided by the farm and the surrounding woodlands to teach environmental chemical principles. We ask you to complete this questionnaire and return it to the Mountain School as soon as possible so that we may plan the best spring term course for these students.

Name of the text you use:

Chapters and sections you will cover before January:

Chapters and sections you plan to cover in the second semester:

Please describe the laboratory experience of this student (a brief description of completed labs would be helpful):

Do you expect this student to take the SAT II chemistry test this spring?

Comments (particularly on this student's strengths or weaknesses and his/her ability to do independent work):

Thank you for taking the time to complete this. We would appreciate any other information you think would be helpful concerning your course or this student.
